

Tinus Strauss

Tinus Strauss got his National Diploma for Software Development in 2003 at Tshwane University of Technology. He then spent the next couple of years working for BME as an electronic detonator technician. In 2006, he started working on Software Development projects for BME. He also studied part-time through UNISA and obtained his Bachelors of Technology in Software development in 2010. Tinus is currently a senior software developer working on projects such as BlastMap III™, DensDepth, WallPro, and XploLog.
