

AXXIS™ CBS LOGGER

PRODUCT DESCRIPTION

The AXXIS™ CBS Logger is a portable device that is used to read the UID and allocate delays to the AXXIS™ EDDs that will be used for blasting.

After the AXXIS™ EDDs are placed in drilled holes, the AXXIS™ Logger can be used to read their UIDs and allocate delays.

The delays can be fixed across all the AXXIS™ EDDs or individually allocated depending on the requirements of the user. The UID and delay information can then be transmitted via Bluetooth from the AXXIS™ Logger to the AXXIS™ Centralized Blasting Box that is connected to the AXXIS™ EDDs.

PRODUCT SPECIFICATIONS

VOLTAGE

3.7 V Li-Ion rechargeable battery

OPERATING TEMPERATURE RANGE

Operation: -20 to +50°C

Storage: -40 to +70°C

THERMAL SHOCK

-40 to 70°C rapid transition

SEALING

IP65

LOGGING MODES

Manual / Automatic

USER INTERFACE

Touch panel, finger or gloved finger input

COMMUNICATION INTERFACE

Bluetooth

MASS

376 g
