DOCUMENT NO: SDS.BME-10 ISSUE DATE: 16-08-2024 REVISE DATE: 16-08-2026 REVISION: 8 PAGE NO: 1 of 5

Document Type:

Safety Data Sheet

Conforms to ISO 11014:2009

Title:

E23TM

1. Identification of the product and Company Identification

Product Name	E23 TM	Manufactured/ supplied by	
Product Type	Emulsifier	ВМЕ	
Synonyms	None	A division of Omnia Group (Pty) Ltd	
Chemical Formula	Not applicable	Physical address	
Emergency telephone number	(+27) 011608-3300	Omnia Holdings, Building H	
QR code		Monte Circle Business Park 178 Montecasino Boulevard Fourways Sandton, 2191 Postal address P.O. Box 70040 Bryanston, 2021 Gauteng, South Africa Contact Tel: +27 11 7098888 E-mail: info@bme.co.za	

2. Hazards identification

This substance is classified as dangerous according to Directive 67/548/EEC and its amendments

GHS Classification:

Acute Tox. 4: H332 Harmful if inhaled
Skin Irrit. 2: H315 Causes skin irritation
Eye Irritation 2A: H319 Causes serious eye irritation

GHS precautionary Statements:

Avoid breathing dust/fume/gas/mist/vapours/spray. Wear protective gloves/eye protection/face protection.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and

easy to do. Continue rinsing. Call a doctor if you feel unwell.

Specific treatment.

Additional hazards: No additional data

Effects and symptoms: In case of eye contact - can cause burning, tearing and redness.

Aggravating conditions: Can cause skin burns

See toxicological information (section 11)

DOCUMENT NO: SDS.BME-10 ISSUE DATE: 16-08-2024 REVISE DATE: 16-08-2026 REVISION: 8 PAGE NO: 2 OF 5

3. Composition/information on ingredients

Substance/preparation:

Chemical name	CAS No	%	EC Number	GHS Classification
Phosphoric Acid alkyl	Confidential	5-15		Met. Corr. 1, H290 Skin Corr. 1B, H314 Acute Tox. 4, H302 Acute Tox. 4, H332 Acute Tox. 5, H313

4. First aid measures

Inhalation : Remove to a well-ventilated area and keep at rest in a position comfortable for breathing. If

breathing difficulties persist – seek medical attention / call poison center.

Ingestion : DO NOT induce vomiting, immediately seek medical attention / call poison center.

Skin contact : Immediately remove contaminated clothing and wash affected area with soap and rinse with water.

Seek medical attention / poison center.

Eye contact : Check for and remove any contact lenses if present. In case of contact immediately flush eyes with

plenty of water for at least 20 minutes. Cold water may be used. Seek medical attention / or contact

poison center.

Note to physician : No specific treatment, treat symptomatically.

Protection of first-aiders : No additional remarks.

5. Fire-fighting measures

Extinguishing media

Suitable : Use CO₂, Dry chemical powder or suitable foam extinguishing agent. Water can be used to cool and

protect exposed material. 170°C, 338°F PMCC

Flash point : 170°C, 338°F Pl Unusual fire/explosion hazards : Not determined.

Special fire fighting procedures : Recommend wearing self-contained breathing apparatus.

Protection of fire fighters : Self -contained breathing apparatus. Wear overalls, gloves, boots and eye protection as a

minimum.

Accidental release measures

Personal precautions : Overalls buttoned to the neck and wrist. Rubber boots. Gloves. Eye protection. Suggested

protective clothing might not be sufficient.

Environmental precautions : Ventilate areas if spilled in confined space or other poorly ventilated areas. Prevent spillage entry

into sewers, waterways, dispose of in accordance with national or local environmental regulations. If spill occurs on roadside, pick-up free liquid for recycle, and/or disposal, using a professional registered waste disposal company. Use appropriate tools to collect into suitable containers.

Residual can be adsorbed on inert material.

Note: See section 8 for personal protective equipment and section 13 for waste disposal.

7. Handling and storage

Handling : Do not breathe dust or mist. Wash thoroughly after handling. Launder contaminated clothing before

Maximum Handling Temperature

Pumping Temperature

Storage

re-use.

Not determined Not determined

: Store in steel drums. Keep containers closed when not in use. DO NOT discharge into drains or

the environment. Dispose to an authorized waste site. Use appropriate containment to avoid environmental contamination. Empty container contains product residue, which may exhibit hazards

of product. No special storage requirements required.

Maximum Storage Temperature:Not determinedLoading Temperature:Not determinedPackaging materials:Store in steel drums.

Storage procedures : No special storage precautions required.

Printed Date: Friday, 16 August 2024.

Copies of this document is allowed. The onus is on the user to ensure that the information contained in the document is valid for use and/or dissemination. Without the approved Red Document Control Stamp, this document shall be seen as an uncontrolled copy and shall not be updated.

DOCUMENT NO: SDS.BME-10 ISSUE DATE: 16-08-2024 REVISE DATE: 16-08-2026 REVISION: 8 PAGE NO: 3 OF 5

8. Exposure controls/personal protection

Exposure Limits : None established

Engineering measures : Use with adequate ventilation
Gloves : Use Nitrile or neoprene gloves
Eye Protection : Chemical goggles or face shield

Respiratory Protection : Use NIOSH/MSHA approved respirator with an organic vapour and dust/mist cartridge if the

recommended exposure limit is exceeded. Use NIOSH/MSHA approved disposable dust/mist mask.

Occupational exposure limits:

Ingredient name
Contains mineral oil
Occupational exposure limits
Under conditions which may generate mists, observe the OSHA PEL of 5mg per cubic meter, ACGIH STEL of 10mg per cubic meter.

Recommended monitoring

procedures : No additional information

Personal protective equipment

Respiratory system No

Skin and body : Protective clothing to minimise skin contact Hands : Chemically resistant gloves

Eyes : Eye protection (safety goggles / glasses)

9. Physical and chemical properties

Flash point : 170°C, 338°F PMCC (Typical)

Flammability Level Upper/Lower : Not determined Auto-ignition temperature : Not determined

Explosive properties : Non-explosive (Material does not have explosive properties)

Vapour pressure : Not determined pH : Not determined Specific Gravity : 0.94 (20°C)

Density : 0.92 – 0.95g/ml (20°C)

Solubility - Water : Insoluble
Percent Solid : Not determined
Percent Volatile : Not determined
Volatile Organic Compound : Not determined
Vapour Density : Not determined
Evaporation rate : Not determined

Odour: MildPhysical state: Brown liquidColour: Brown

Viscosity : 350 - 600 cP (40°C)
Odour threshold : Not determined
Boiling point : Not determined
Pour Point Temperature : -27°C, -17°F
Melting / Freezing point : Not determined
Neuro toxicity : Not available

10. Stability and reactivity

Stability : Material is normally stable at moderately elevated temperature and pressures.

 Decomposition Temperature
 : Not determined

 Incompatibility
 : Oxidising agents

 Hazardous Polymerisation
 : Will not occur

Thermal Decomposition : Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete

combustion. Under combustion conditions, oxides of the following elements will be formed:

Phosphorous

Conditions to avoid : Not determined

PAGE NO: 4 OF 5 DOCUMENT NO: SDS.BME-10 ISSUE DATE: 16-08-2024 REVISE DATE: 16-08-2026 REVISION: 8

11. Toxicological information

Acute Exposure:

Eyes Corrosive to eyes, Based on data from components or similar materials

Corrosive to the skin. Based on data from components or similar materials. Prolonged or repeated

Skin skin contact as from clothing wet with material may cause dermatitis. Symptoms may include

redness, edema, drying and cracking of the skin.

The LD50 in rabbits is >2000mg/Kg. Based on data from components or similar materials. **Dermal Toxicity**

Inhalation Toxicity No data available to indicate product or components may be a toxic inhalation hazard

The LD50 in rats is based on data from components or similar materials. Swallowing this material **Oral Toxicity** can cause burns to the mouth and esophagus. Asphyxiation can occur from swelling of the throat.

Perforation of the esophagus and stomach can occur.

Dermal Sensitisation No data available to indicate product or components may be a skin sensitiser. Inhalation Sensitisation No data available to indicate product or components may be respiratory sensitiser

Chronic Exposure:

Chronic toxicity No data available to indicate product or components present at greater than 1% are health hazards

This product contains mineral oils which are considered to be severely refined and not considered Carcinogenicity

to be carcinogenic under IRAC. All of the oils in this product have been demonstrated to contain

less than 3% extractables by the IP 346 test.

No data available to indicate product or components present at greater than 0.1% are mutagenic or Mutagenicity

genotoxic.

No data available to indicate product or components present at greater than 0.1% that may cause **Reproductive Toxicity**

reproductive toxicity

No data available to indicate product or components present at greater than 0.1% may cause birth **Teratogenicity** defects

12. Ecological information

Soil/water partition coefficient Not determined

Biodegradation At least 25% of the components in this product show moderate biodegradation based on OECD

301-type test data. At least 25% of the components in this product show moderate biodegradation

based on OECD 302-type test data.

Bio accumulation potential 25% or greater of the components potentially bioconcentrate, based on octanol/water coefficients.

Remarks

Aquatic toxicity:

Freshwater Fish Not determined Freshwater Invertebrates Not determined

Algae Inhibition The acute EC50 is 10 - 100mg/L based on component data

Saltwater Fish Not determined Saltwater Invertebrates Not determined

13. Disposal considerations

Waste must be disposed of in accordance with federal, state and local environmental control Methods of disposal

regulations. Treatment, storage, transportation, and disposal must be in accordance with

applicable National and Provincial regulations.

14. Transport information

Regulatory information	UN Number	Name and description	Class	Packaging Group	Additional information
ICAO/IATA I & II	1760	CORROSIVE LIQUID N.O.S.	8	III	
ADN Class	1760	CORROSIVE LIQUID N.O.S.	8	III	
IMDG Class	1760	CORROSIVE LIQUID N.O.S.	8	III	Phosphoric acid alkyl
U.S. DOT Bulk	1760	CORROSIVE LIQUID N.O.S.	8	III	Phosphoric acid alkyl

DOCUMENT NO: SDS.BME-10 REVISE DATE: 16-08-2026 ISSUE DATE: 16-08-2024 REVISION: 8 PAGE NO: 5 OF 5

15. Regulatory Information

EU Regulation Hazard symbols

Indicator of Danger:

Risk phrases Xi - Irritant (Phosphoric acid alkyl)

R8 - Contact with combustible material may cause fire

R36/38 - Irritating to eyes and skin

Safety phrases S15 - Keep away from heat

S17 - Keep away from combustibles

R20/22 - Harmful by inhalation and if swallowed S25/25 - Avoid contact with skin and eyes

Product use Classification and labeling have been performed according to EU directives 67/548/EEC.

1999/45/EC including amendments and the intended use.

16. Other information

Full text of R-Phrases with R3 Extreme risk of explosion by shock, friction, fire or other sources of ignition

R5 Heating may cause an explosion R8

Contact with combustible material may cause fire R9 Explosive when mixed with combustible material

R10 Flammable

May cause harm to the unborn child R61 Possible risk of impaired fertility R62 R20/22 Harmful by inhalation and if swallowed

Harmful if swallowed R22 R36/38 Irritating to eyes and skin R33 Danger of cumulative effects

Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic R50/53

environment

History

Kady Govender: R&D Laboratory Supervisor Recommended by Authorised by Myra Coetzer: Acting R&D Laboratory Manager

Remarks:

This SDS summarizes, at the date of issue, our best knowledge of the health and safety hazard information of the product, and in particular how to safely handle the product in the workplace. As BME cannot control the use and handling of the product, each user must review the SDS in the context of how the user intends to handle and use the product in the workplace.
